PROFESSIONAL SUMMARY

AI/ML-focused Computer Science undergraduate at NTU with a track record of shipping production-grade AI systems in regulated, enterprise environments. Passionate about the intersection of LLMs, agentic architectures, and data engineering; and building solutions that make complex systems more intelligent and accessible.

EDUCATION

Nanyang Technological University, Singapore

Aug 2023 - Jul 2027

Bachelor of Computing (Honours) in Computer Science | Second Major in Entrepreneurship | Double specialization in AI and Data Science | Work Study Degree Program with DBS Bank

INTERNSHIP EXPERIENCE

DBS BANK

May 2026 - Present

AI and Data Intern (Wealth Management Technology - Data Team)

- Architected a multi-agent LLM pipeline using Claude Code to solve a critical documentation gap across 800+ enterprise SQL pipelines, auto-generating structured, human-readable technical documentation at scale.
- Built an AI knowledge assistant (Chatbot) on Dify integrated with a custom MCP server, enabling natural-language querying of dataset metadata, job details, and upstream/downstream data lineage across enterprise pipelines.
- Engineered a hybrid search knowledge base in Dify using custom chunking using dense embeddings and keyword retrieval, improving retrieval accuracy and reducing LLM hallucinations for domain-specific enterprise terminology.

DBS BANK

May 2025 - Dec 2025

AI and Data Intern (Customer Management and Analytics Dept – Smart Search Team)

- Contributed to an enterprise Smart Search platform, working end-to-end from proof-of-concept model evaluation to production readiness for an embedding-based semantic search system.
- Developed Python-based automation for large-scale evaluation and regression testing, refined ingestion and search APIs, and performed chaos testing and observability checks to improve system reliability.
- Worked closely with engineers to validate ranking quality, debug distributed services, and support production configuration and deployment readiness in a regulated banking environment.

Singapore Airlines (SIA) Engineering Company

May 2024 - Aug 2024

Data Analyst Intern (Non-Destructive Testing Department)

- Enhanced data collection and extraction efficiency by 60% by implementing automation tools like Ablebits and creating a master database consolidating 5 years of aircraft maintenance records with Power Query.
- Designed 10+ interactive Power BI dashboards, visualizing trends, maintenance request volumes, and workforce distribution, improving data-driven decision-making by 40%.
- Performed operational analysis, forecasted demand and optimized workforce planning, driving a 10% boost in departmental efficiency and resource utilization.

SKILLS

- **Programming Languages:** Python, SQL, C, Java, TypeScript, JavaScript, HTML, CSS, React (Learning C++ and R)
- **AI / ML:** LangChain, LlamaIndex, Multi-Agent Systems, RAG, Dify, MCP, RAGAS, ChromaDB, Vector Databases, sentence-transformers, scikit-learn, Prompt Engineering, Embedding Models, Semantic Search, NLP, OpenAI API, Claude API, Hugging Face, TensorFlow, PyTorch, Context Engineering
- **Data & Analytics:** Pandas, NumPy, Matplotlib, Plotly, Power BI, Power Query, Recharts, Dashboarding, Spark
- **Web & Backend:** Next.js, FastAPI, Django, Node.js, PostgreSQL, MongoDB, Supabase, Tailwind CSS, REST APIs
- **DevOps & Tools:** Docker, Git, Vercel, Jenkins, Swagger, Figma, Jupyter, VS Code, Grafana, Kibana
- **Languages:** English (Fluent), Hindi (Fluent), Gujarati (Intermediate)
- **Courses:** Google AI Professional Course, Google Data Analytics Specialization Course (Google Career Certificate)

PROJECT WORK

Multi-Agent Stock Research and Analysis Assistant

May 2026 - May 2026

- Built a multi-agent AI system where a coordinator agent orchestrates 3 parallel specialist sub-agents (fundamentals, technicals, sentiment), synthesizing a structured BUY/HOLD/SELL verdict with confidence scoring and JSON output.
- Grounded agent analysis in real market data via Alpha Vantage API (P/E, EPS, ROE, moving averages, debt/equity, analyst targets) and served LLM inference via Groq (LLaMA 3.3-70B) with parallel async calls to reduce total analysis latency vs sequential execution.
- Implemented the coordinator + specialist agentic pattern end-to-end in TypeScript on Next.js, demonstrating production-ready multi-agent orchestration with structured outputs across a full-stack AI application

- Personal Budget Tracker**

Mar 2026 - Mar 2026
- Built a full-stack personal finance tracker using Next.js 14, TypeScript, PostgreSQL (Supabase), and Prisma ORM; implemented Google & GitHub OAuth and deployed to Vercel with a GitHub CI/CD pipeline.
 - Integrated OpenAI GPT-4o-mini for AI-powered transaction auto-categorization and a personalized budget advisor that analyzes income, fixed commitments, and 3-month spending history to generate tailored monthly allocations.
 - Designed an interactive analytics dashboard with Recharts featuring 6-month income vs. expense trend charts, category donut chart, and daily spending visualization.

LEADERSHIP EXPERIENCES | CO-CURRICULAR ACTIVITIES

- NTU Women in Tech – Logistics Director**

Aug 2024 – Aug 2025
- Spearheaded logistics for 5 large-scale events, including hackathons and datathons sponsored by companies like Jane Street, HP, and AWS, ensuring seamless execution and 100% on-time delivery for 80+ participants per event.
 - Coordinated gift procurement, catering arrangements, and vendor coordination while supervising 2 subcommittee members, meeting event requirements with flawless execution and staying within budget constraints.

- JA Company of the Year – GreenDomino – Co-Founder & Head of Productions**

Aug 2021 – Dec 2022
- Secured 1st place nationally, 2nd place in APAC (16 teams, 10 countries); led 14 member team to 20% profit margin above projections

HOBBIES & INTERESTS

- Dancing, Music Appreciation, 3D Wooden Puzzles, Food, Traveling, and creating artwork through Diamond Painting
